## Do i have to kill amita far cry 4

The Far Cry 4 Balance of Power missions are one of the most exciting elements that Ubisoft introduced in franchises. Far Cry 4 Balance Of Power Guide – Amita Or Sabal will provide some information on the various routes that people have taken to give you the opportunity to align with the right leader. Please be aware, this guide includes important plot spoiler. At different points of the game you reach a Balance of Power mission. These missions provide all 2 alternatives, if you choose to deploy with Amita or Sabal. The choice you make will change the following mission, change the goals in future missions and create different opportunities until the next Balance of Power mission is available. A playground of brutality and unbalanced freedom that is perfectly based on the solid foundations laid by its predecessor. A voice worthy of the franchise and a must buy for all open-world players I have listed the decisions I have chosen on my first playthrough so far and hope to update it to include alternative options on my second playthrough. Alternatively, if you have made a different decision to one I have covered below, we will appreciate as much information as possible so you can update the guide. Send a comment at the bottom of this article and we will credit you your name and update the guide. Far Cry 4 Amita or Sabal? Choose the Sabal If you choose Sabal you will have to protect a rebel village. Once you get to the village you have to defend it. Take the mines from the box and plant them on the path that leads to the base. From there climb up the tower and use it to kill any enemy you can see. The enemies use bows so that they will not appear on the radar. Listen to where your allies are saying and tracking them. After three waves this field will be defended. After that you will have to run through the woods to the Alfa camp. Avoid hunters in the woods and once youto the field use the binoculars per enemy tag. enemies.They were 6 enemies in total here and I used the furtive and arch approach to kill them all without being seen. If you want to go a little more ham use the bear cage in the center to mix things up. Just don't be too close or otherwise the bear will turn on. Choose Amita Amita wants you to recover information from a Golden Path field. The first field is simple, a single enemy hunter. The second is harder. When you reach the 2nd field use some baits to lure away the wolf. There are 5 hunters in the area and 3 enemies who have apple weapons. The best tactic I found was to steal your way home and then use the windows as a cover to heal in Hunter's hits. They're not going home. Choose Sabal – Sabal wants you to burn the Opium fields for this mission. There's a lot of guards and dogs here, so I'd take a bow for some kind of stealth. You will also need fire in the form of Molotovs or a flamethrower. The fields just need to be burned. If a guard sees him on fire, the sprinklers will start and stop the fire. If this happens turn off the generator and restart the fire. There are also explosive barrels in the fields and close to the drug piles that can be used to set opium on fire. I ended up being seen and I just made the firefighting road smoothly. If you need a flamethrower there is one in the building behind the wooden doors you can kick. Choosing Amita Amita wants to recover Opium crops at the Kyra Tea Factory to fund Golden Path activities. Go to the target and take out all the guards and dogs. There are two alarms on both sides of the main compound. Once the Golden Path is released, it will help in your defense of the Poppy Fields. Keep an eye on the map and move between each Poppy field as the goal changes, making sure to bet first for enemy fire units.did you choose this path? Leave a comment below. choose amita amita wants to take control of a brick factory to helpOpium and finance the rebellion of the Golden Path. When you start the mission be sure to use the camera to paint goals and be cautious of the patrol truck. You can hit 2 of the generators from the top of the hill without having to go anywhere near enemy patrols. Use a grenade or the like and remove that to the extreme left and then that directly in front. Then Amita will give you the position of the final generator that can be reached after the outside of the compound to the right. After that, return close to the original point and you can get access to the lab without getting any discomfort. Choose the Sabal For this mission you are offered the opportunity to save or destroy the Temple. Sabal opts to protect him. This is the final Balance of the Power Mission and probably has the greatest influence on what happens at the end of the game. Did you choose this route? Leave a comment below. If you choose Sabal, he'll ask you to kill Amita. I chose not to, and you will never see her again by choosing Amita This is the final Balance of the Power Mission and probably has the greatest influence on what happens at the end of the game. Amita wants you to destroy the Temple to free Kyrat's women. When you reach the island there are 3 alarms and a lot of guards. If you take alarms the reinforcements will be by boat and helicopter – both will come from the same angle you did when you reached the beach, the south-west side. It is a simple mission if you opt for the stealth approach or assault. I'd suggest we bring something explosive to remove enemy vehicles. A few short missions after Amita asks you to kill Sabal while trying to divide the Golden Path. As far as we know, there are 3 alternative endings in Far Cry 4. I wrote information about the final I experienced when completing the game based on the choices I made. You've got it.live Pagan Min and sit at the table after someone told you to stand up and open a door doorHim. See a helicopter and a shed. He takes you out and tells you Lakshmana or w/e is that you are half sister. I assume that Min's daughter and Ishwari, Mohan killed Lakshmana and in return Ishawari killed Mohan. You enter the shrine and place the urn of Ishwari near Lakshmana. After the exit from the sanctuary, you see Min on the helicopter you see before and tells you that Kyrat is all yours, but he is holding the helicopter and flies away. You can shoot the helicopter if you want. The helicopter drops immediately after a blow and explodes (even with my sniper rifle that could not kill a normal helicopter in play). Receive the message "The King is Dead" and then Fin/credits. The ugly ending occurs if you decide to shoot Pagan Min at the table when you give the choice of the two. Credits roll. At the beginning of the game, when Pagan Min asks you to wait in the Royal Palace, wait 15 minutes and you will see the alternative ending.
